

20 October · 16:00–17:00

Living Dharma

Hackathon

A collaborative challenge using research, data and technology to explore how Living Dharma can be understood across communities and contemporary technologies.

Workshop leader

Puneet Bindlish

The challenge

Turn questions about dharma, global citizenship and community life into useful ideas and practical research directions.

Who can join

Students, researchers, community members and curious problem-solvers. Technical experience is not required.
